

SA203 Soybean Quality

August 8, 2019

What do test results tell you about your seed quality?

SoDak Labs is offering an online learning opportunity on soybean testing. You will gain knowledge on best testing protocols, along with an understanding of lab results and comments.

Topics include:

- * Seed Development
- * Water uptake and mobilization of reserves
- * Seed moisture and hypochlorite physical tests
- * Physiological and pathological tests: germination, tetrazolium, three vigor tests
- * Microbial testing
- * Cultivar purity tests: hilum check, peroxidase, hypocotyl growouts, and more

There is **no charge** for this one hour webinar, but **pre-registration by August 1 is required** so we can email you the presentation link to watch.

Our instructor, Tim Gutormson, brings 36 years of seed technology experience in testing and seed research. He has also instructed college level courses, workshops and webinars for 30 years. Tim has BS and MS degrees in Agronomy, is a Registered Seed Technologist of the SCST, past president of SCST, past chairman of the American Seed Research Foundation and the current chairman of Seed Testing Research Foundation. Tim is currently an owner of SoDak Labs, Inc., located in Brookings, South Dakota.

Please visit our website for more information www.SoDakLabs.com or call Tim Gutormson at 605-692-2758.
